PROFILE

Data Analytics MSc candidate at the National College of Ireland, experienced in turning financial and commercial data into business decisions across banking and e-commerce. Skilled in Python, SQL, Power BI, R and Excel, with hands-on project work in machine learning, big-data pipelines and BI dashboards. First Class Honours (1:1 equivalent) in Electronics Engineering. Seeking Data Analyst or Business Analyst role in Ireland.

AVAILABILITY & VISA INFORMATION

Full-time from September 2026 · Currently Stamp 2; eligible for the Stamp 1G Graduate visa on completion of the MSc.

TECHNICAL SKILLS

BI & Reporting: Advanced Excel, Power BI, Tableau — dashboards, KPIs, financial & commercial reporting

Analytical: Financial & commercial analysis, forecasting, profitability & margin analysis, variance analysis, process analysis

Data & Systems: SQL, ERP/CRM data extraction & validation, data cleaning, PostgreSQL

Programming: Python (pandas, NumPy, scikit-learn), R, statistical modelling

Project Management - Holds a Single Subject Diploma from the Institute of Commercial Management (ICM).

Certifications:

- **Excel Skills for Data Analytics and Visualization**, Macquarie University (Aug 2024)
- **QQI Level 5** — Care Skills & Care of the Older Person
- **Deep Learning with Keras and Tensorflow**, IBM (Feb, 2026)
- **Power of Statistics**, Google (Mar 2025)
- **SQL for Data Science**, University of California, Davis (Jan 2025)
- **IBM Data Analyst**, IBM (Jan 2025)
- **Microsoft Power BI Data Analyst**, Microsoft (Sep 2024)

WORK EXPERIENCE

12/2025 – Present
Dublin, Ireland

Healthcare Assistant (Part-Time)

Heritage Homecare Dublin ☑

- Handled sensitive personal information under strict standards and data-protection requirements, maintaining accuracy and confidentiality across all records.
- Managed multiple care tasks to schedule within a multidisciplinary team, communicating clearly to ensure continuity and quality.

04/2024 – 08/2025
Yangon, Myanmar

Assistant Business Analyst

uab bank ☑

- Analysed corporate financial performance across 25+ lending cases — evaluating financial statements, margins and market conditions — and presented clear recommendations to senior leadership, informing decisions behind over 188 billion MMK in financing.
- Built and maintained financial reporting and performed analysis of risk, profitability and portfolio performance against the bank's targets and risk appetite.
- Acted as team lead for six months after the team lead's departure, leading a team of 7, training interns on financial analysis and forecasting, and communicating findings to senior stakeholders.

09/2021 – 03/2024
Yangon, Myanmar

Key Account Manager, FMCG

Daraz (Alibaba Group) ☑

- Analysed sales performance, product mix and customer profitability across 50+ FMCG clients, identifying revenue-growth opportunities and informing pricing and category strategy.
- Built monthly Power BI and Excel dashboards enabling teams to monitor performance against targets, and partnered with Category Managers to improve forecasting accuracy.
- Translated complex commercial data into clear recommendations for decision-makers across cross-functional teams.

11/2019 – 01/2020
Tsing Hwa, Taiwan

Internship Trainee

National Tsing Hwa University

- Implemented specialized research on High-speed THz Imaging using Digital Light Processing (DLP).
- Engineered an automation system for the DLP LightCrafter 6500 by leveraging GUI and Python source code controlled through a USB interface.
- Pioneered the foundation for future innovative THz research, including THz ghost imaging and real-time THz 3D imaging based on compressed sensing.

PROJECTS

Atelier Cinema BI & CRM (group) — *Tableau, Salesforce*. Built a CRM data model and dashboards tracking customer and sales performance. github.com/yawaithone/atelier-cinema-bi-crm 

Hospital Readmission Prediction — *Python, LightGBM, SMOTE*. Predicted 30-day readmission on the UCI diabetes dataset, tuned to catch the highest-risk patients. github.com/yawaithone/30days-hospital-readmission-prediction 

Distributed Flight-Delay Data Pipeline — *Python, Spark, AWS S3, PostgreSQL, Power BI*. End-to-end medallion pipeline over 7M+ records analysing how weather severity drives US flight delays. Wrote SQL queries in PostgreSQL to extract, join and aggregate 7M+ records feeding Power BI dashboards. github.com/yawaithone/flight-delay-bigdata-pipeline 

High Speed THz imaging & Digital Light Processing — Research using DLP, focusing on implementing DLP LightCrafter 6500 automation for future THz ghost imaging and real-time THz 3D imaging based on compressed sensing.

Full Portfolio 

EDUCATION

09/2025 – Present
Dublin, Ireland

MSc in Data Analytics

National College of Ireland

Modules - Statistics and Optimization, Analytics Programming & Data Visualization, Business Intelligence & Business Analytics, Data Governance, Ethics, and Sustainability, Data Intensive Scalable Systems - Big Data Analytics, Data Mining and Machine Learning, Deep Learning and Generative AI, Domain Applications, Research Practicum.

12/2014 – 10/2024
Yangon, Myanmar

Bachelor of Engineering (Electronics)

Yangon Technological University (YTU) 

- **Result:** Achieved strong academic performance with a GPA: 4.4/5, equivalent to First Class Honours (1:1) in the Irish Education system.
- **Thesis Project & Publication:** Completed a thesis on Multisensor Data Collection for Time Sensitive Network and published the paper at The National Conference on Science and Engineering (NCSE 2024) on July 2024.
- **Duration Note:** The program duration was extended due to the COVID-19 pandemic and associated challenges in the home country.

12/2021 – 12/2022
South West London,
United Kingdom

RQF Level 5 Diploma in Business Management

Advancing Business Education (ABE)

- **Result** : Passed with Merit

INTERESTS & ACHIEVEMENTS

Cultural Exchange

- Facilitated a vibrant cultural exchange between Temasek Polytechnic and YTU students, fostering cross-cultural understanding during the Temasek Foundation Exchange Programme (2017-2018).

Competition

- Collaborated in the Robotic Competition which minimizes the run speed of the robot, during the Japan-Asia Youth Exchange Program in Science (SAKURA Exchange Program in Science) at Shibaura Institute of Technology, Japan (Jan 2018).

Extracurriculum

- Member of NCI badminton club (Actively join once a week).

PUBLICATIONS

07/30/2024

Implementation of Multisensor Data Collection for Time Sensitive Network

The National Conference on Science and Engineering (NCSE 2024)

The research explores Wireless Sensor Network (WSN) technology for vehicle-to-vehicle communication, crucial for intelligent transportation systems. The main objectives are data collection, data visualizations and data analysis using SPSS software.
